### **DETAILED ACTION**

Upon further consideration, the examiner has withdrawn the previous restriction requirement and has now treated all pending claims.

#### ***Drawings***

1. Figure 11 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

#### ***Specification***

2. The disclosure is objected to because of the following informalities: page 10, "gouge into the first conduit 16" appears to be incorrect. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 11 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not

described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 11 calls for "compressible sleeves" directed to embodiment shown in Fig. 10; claim 1 calls for the embodiment depicted in Fig. 17a. These are two patentable distinct embodiments therefore they cannot depend from each other.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 8-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (US 3870278) in view of Wipo (0245704).

Lee discloses a prop having a first end and a second end comprising:

a first hollow conduit (12), a second conduit (23,21,16) slidably received in the first hollow conduit, a ring (45) slidably received around the second conduit, and

at least one handle (37) connected to the ring and the first hollow conduit. Lee

discloses the invention substantially as claimed. However, Lee lacks a clamp assembly positioned adjacent the first hollow conduit and the second conduit. Wipo '704 teaches

a clamp assembly positioned adjacent the first hollow conduit and the second conduit

(see Figs. 1,9). It would have been considered obvious to one of ordinary skill in the art

to modify Lee to include the clamp assembly as taught by Wipo '704 in order to prevent

the second conduit from sliding into the first conduit once the required extension of the second conduit has been established.

7. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee in view of Wipo '704 as applied to claim 1 above, and further in view of Mommertz (US 844385).

Lee (once modified) discloses the invention substantially as claimed. However, the (once modified) Lee lacks wedging members. Mommertz teaches wedging members (see Figs.). It would have been considered obvious to one of ordinary skill in the art to further modify the (once modified) Lee to include the wedging members as taught by Mommertz to prevent the second conduit from sliding into the first conduit once the required extension of the second conduit has been established.

8. Claims 12,13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee in view of Wipo '704 as applied to claim 1 above, and further in view of Jakoubek et al. (US 2068491)

Lee (once modified) discloses the invention substantially as claimed. However, the (once modified) Lee lacks visual indicator. Jakoubek et al. teaches visual indicator (30). It would have been considered obvious to one of ordinary skill in the art to further modify the (once modified) Lee to include visual indicator as taught by Jakoubek et al. to prevent overextending the second conduit.

***Allowable Subject Matter***

9. Claims 6,7,14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
